# User Flow of Angular Project "GreenScreen"

**User story**

"As a user, I want to be able to receive information on movies, directors, and genres so that I can learn more about movies I've watched or am interested in."

**Key Features**

- welcome screen with login form
- registration form
- list of all movies (after authentication)
- single movie card (after clicking on single movie in list of all movies)

**end**

**start**

button

login form → first-time visitor? → link → register form

button

user data authenticated?

movie list → want to exit application? → button → end

more details on one movie?

button

single movie details

button → single movie details ← button

more info on director?

need definition of genre?

link

link

return to single movie? ← director details

genre details → return to single movie?
